water or the Department of Environment could ask for maintenance flows for the salmon which is their big thing because it's the tourist fish, the commercial fish. Trout, in my opinion, they don't concentrate on as heavily as they could. Because there's a lot of trout up there, which nobody seems to be worrying too much about. I feel they should be protected as well. That will be one of my recommendations, that we try to preserve those populations. Below the dam, they will be cut off due to lack of water • so you lose those. The only thing you can do here is talk theoretically
